Subject: Dear Sir:

Dear Sir:

Why on earth would the clinton Administration & Justice department find it necessary to destroy one of the most productive employer in the United States.

All because of some whiney competitors who can't make it without the help of the most corrupt group of politicians in our long history.

Leave Microsoft alone and maybe it will give the country a good boost out of the clinton inspired recession.

There are plenty of real problems for Washington to deal with. Why not get on with the building process.

Joe & Betty Bannan
